Other: [npm, GIMP];

+ PROJECTS

Arcade Game Clone | eter5.github.io/arcade–game (work in progress)   June 2015

- Clone of the classic game, Frogger. Udacity provided the art assets and game engine.
- Coded player, enemies, and other game entities in JavaScript's object-oriented pseudo-classical style.
- Technologies: [HTML5 Canvas, JavaScript];

Interactive Resume | eter5.github.io/resume   May 2015

- My interactive resume. Code my own resume was fun!
- Technologies: [HTML5, CSS3, JavaScript, jQuery];

+ RELEVANT EXPERIENCE

Eter5 Lab | Front–End Web Developer + PHP Back–End Engineer   Anywhere | August 2012 – Today

- My own software lab, for external clients.

Web Contabil | PHP Back–End Engineer   Sao Paulo, Brazil | July 2014 – February 2015

- It was a temporary work for a company in São Paulo, Brazil. My job was to develop the Back-End in PHP5 and MySQL. The data exchange with the Front-End (developed in Ext JS) was through JSON.

3e Concepts | PHP Back–End Engineer   D.F., Mexico | August 2012 – March 2013

- I worked for a short period of time in 3e, but for me it was a lot of learning experience. I performed maintenance tasks on PHP back-end projects and I developed some projects based on Codeigniter and Symfony2 technologies. It was a great experience working in 3e Concepts.

+ EDUCATION

Udacity, Inc. | Front–End Web Developer Nanodegree   Mountain View, CA | 2015 – Today

Code School, LLC. | HTML5/CSS3/JavaScript master course   Orlando, FL | 2013 – 2014

Instituto Tecnologico Universitario | Software Development Engineer   Puebla, MX | 2007 – 2009

+ SOMETHING ABOUT ME, HOBBIES AND OTHER ABILITIES

In 1985 at age of nine years I made my first program on a Commodore 64 personal computer, the programming language that I used for first time was BASIC. From that time computing science became a passion for me.

I consider myself an open, positive, happy and responsible person; with a high ability to learn fast, communicate ideas and teamwork. I'm a padawan of life.
